

HACK SUMMIT A'26 RULEBOOK

- Teams must consist of a minimum of 2 and a maximum of 4 members.
- Every participant must be officially registered for the event and can be a member of only one team.
- All participating teams must develop their projects within the boundaries of the officially announced tracks of Hack Summit A'26.
- The proposed solution should demonstrate innovation, creativity, technical feasibility, and a clear approach towards solving the identified problem.
- All submitted ideas and projects must be original and developed by the participating team.
- Teams may use publicly available APIs, libraries, frameworks, datasets, and open-source resources, provided that their usage complies with the respective licenses and is appropriately acknowledged.
- Participants are permitted to use the internet for research, learning, documentation, reference material, APIs, libraries, and other relevant resources.
- However, the core idea, implementation, and development of the final project must be carried out by the participating team.
- The Team Leader must ensure that all team members are added as collaborators or contributors to the repository.
- Teams are expected to maintain regular and meaningful commits throughout the hackathon.
- The GitHub repository and commit history may be monitored by the organisers and judges to assess the team's progress and individual contributions.
- The presentation submitted by each team must not exceed 10 slides.
- The maximum presentation time allotted to each team will be 5 minutes.
- Teams must strictly adhere to the allotted presentation time. Exceeding the time limit may result in interruption or affect the team's evaluation.

- The presentation will be followed by a Question-and-Answer (Q&A) session, during which the judges may ask questions related to the idea, implementation, technology, functionality, and feasibility of the project. All team members **MUST** participate in this session.
- All participants are expected to maintain a professional, respectful, and inclusive environment throughout the event.
- Any project submitted after the prescribed deadline may not be considered for evaluation unless otherwise permitted by the organisers.
- Any such changes will be communicated to the participants through the official communication channels.
- Participation in Hack Summit A'26 implies acceptance of all the rules and regulations mentioned above.
